New York, N.Y. 10022

Dear Sir:

I draw your kind attention to the fact that my research interest is in the area of Endothelial Cell Biology with a special reference to Blood Coagulation and Cardiac Function. I wonder, whether, your organization has any program to support research in the above mentioned areas. I will, therefore, appreciate it very much if you could send me the necessary informations and guidelines for submission of reserach proposals at your earliest convenient time.

Thanking you.

Sincerely,

Dipak K. Banerjee, Ph.D.
Associate Professor
